# Sediment & Site Safety

**SILT SAUSAGES** are made from a black non-woven geotextile. Continuous lengths are also stocked which can be cut as required. Silt Sausages can be used in a variety of situations such as around drains or building sites, as a sediment control device or on contours to inhibit run off as well as providing constant filtering.

**Standard Size: 250mm x 2m (layflat), 250mm x 50m**  
Other sizes available on special order

**1380 FILTER BAGS** are made from a high flow filtration woven TerraStop™ 1380 silt fence. They are green and black in colour and come equipped with a cord for easy tying off. These bags are ideal for filling with blue metal gravel, sand or other filter mediums as well as specific products such as diatomite earth, granulated rubber or mineral absorbents.

Filter Bags are ideal for use around drains and other areas where the filtering out of sediment is needed.

**Size:** 250mm x 750mm (layflat)  
Also available in an economy version: 250mm x 840mm (layflat)

**HESSIAN BAGS** are the most commonly used of all the sediment control bags. They are a temporary but cost effective solution for most sediment control problems.

**HAY BALE BAGS** are made from a black non-woven geotextile and come complete with draw cord and handles. They are available in single or double hay bale size.

**Single Size:** 1.15m x 0.42m x 0.5m  
**Double Size:** 2.3m x 0.42m x 0.5m

**SEDIMENT PUMP BAGS** are made from a UV stabilised black non-woven geotextile and designed to filter out fine sediment particles that contaminate sensitive drains and waterways. They are an environmentally friendly, re-useable bag that after use can be turned inside out to dry. Any remaining soil or clay can then be easily removed with a stiff broom.

Pump Bags are ideal for use in industries where the pumping out of stormwater or dammed water from a site is necessary. When used in conjunction with Polyfabrics Silt Sausages, added filtration protection of drains is provided.

**Size:** 2m x 4m  
Special sizes made to order

**BARRICADE MESH** is an orange coloured, extruded, hi-vis barrier product suitable for more lasting applications.

**Size:** 1m x 50m

**SHADECLOTH** is a knitted product available in various grades and colours. They are used for privacy screens and dust control.

**SITE FENCE** is a budget barrier product with either a yellow stripe or white laminated stripe.

**Size:** 0.9m x 50m
