

# Tubex Shelterguard

Tubex shelters have been specially designed to provide the right solution for your planting needs. Over the years we have developed unique features that all contribute to the effective establishment of vines and fruit trees.

Our most popular mesh shelter, the Tubex Shelterguard provides reliable plant protection, enhances growth as well as being designed to blend subtly into the natural environment.

A unique product, the Tubex Shelterguard is designed to give the benefits of enhanced growth through the microclimate but also allows the plant to acclimatise to the outside environment through its two-staged degradation process. Welded to the 12mm square mesh is a very fine Polyethylene film which starts to degrade after approx. 3 growing seasons, gradually exposing the plant to the outside environment allowing the bark to harden.

\*Shelter longevity is dependent on site and weather conditions but is typically a minimum 7 years.

PRODUCTS	SHELTERGUARD
Heights (m)	0.4, 0.6, 0.75, 0.9
Diameter (mm)	80 – 110
Nest	4
Bundles	100
Colour	Olive Green
Ties	1 x 9" 0.45m + 2 x 9" 0.75m +
Support	Cane or Stake

Other sizes are available, please call for more information
