

TEC Mat® Fibre Mat

Erosion Control

TEC Mat® Fibre Mat is 100% organic, fully biodegradable and sourced from renewable sources. This TEC Mat is the latest and longest lasting matting to be used for new plantations to provide protection from weeds and pest attack. TEC Mat® Fibre Mat is up to 1600 grams per m² with the ability to absorb moisture up to 3 times its mass, providing ultimate moisture retention, while preventing any unwanted weeds germinating.

It comes in a range of weights and sizes to suit your needs, and due to its high density generally only needs 2 pins to secure the material.

TEC Mat® Fibre Mat has complete block out of light penetration, is a renewable product and resists attacks from termites.

SPECIFICATIONS	TEC MAT® FIBRE MAT
Weights	1600g/m ² (nominal)
Unit Size	400mm x 400mm 500mm x 500mm
Colour	Natural
Water Absorption ASTM D1117	250% of original body mass
Erosion Control ASTM D7101	<1g/m ² soil loss against 100mm/hr rain fall
Light Penetration ASTM D6567	0% penetration from 100% ground cover
Material	100% organic Fibres needle punched and pressed
Longevity	Lasts 4-5 years depending on the grade
